But, they got carried away. The aliens made a 100-foot tall robot that could shoot lasers out of its eyes. It turned on the aliens, though. It was called Hypnocron.

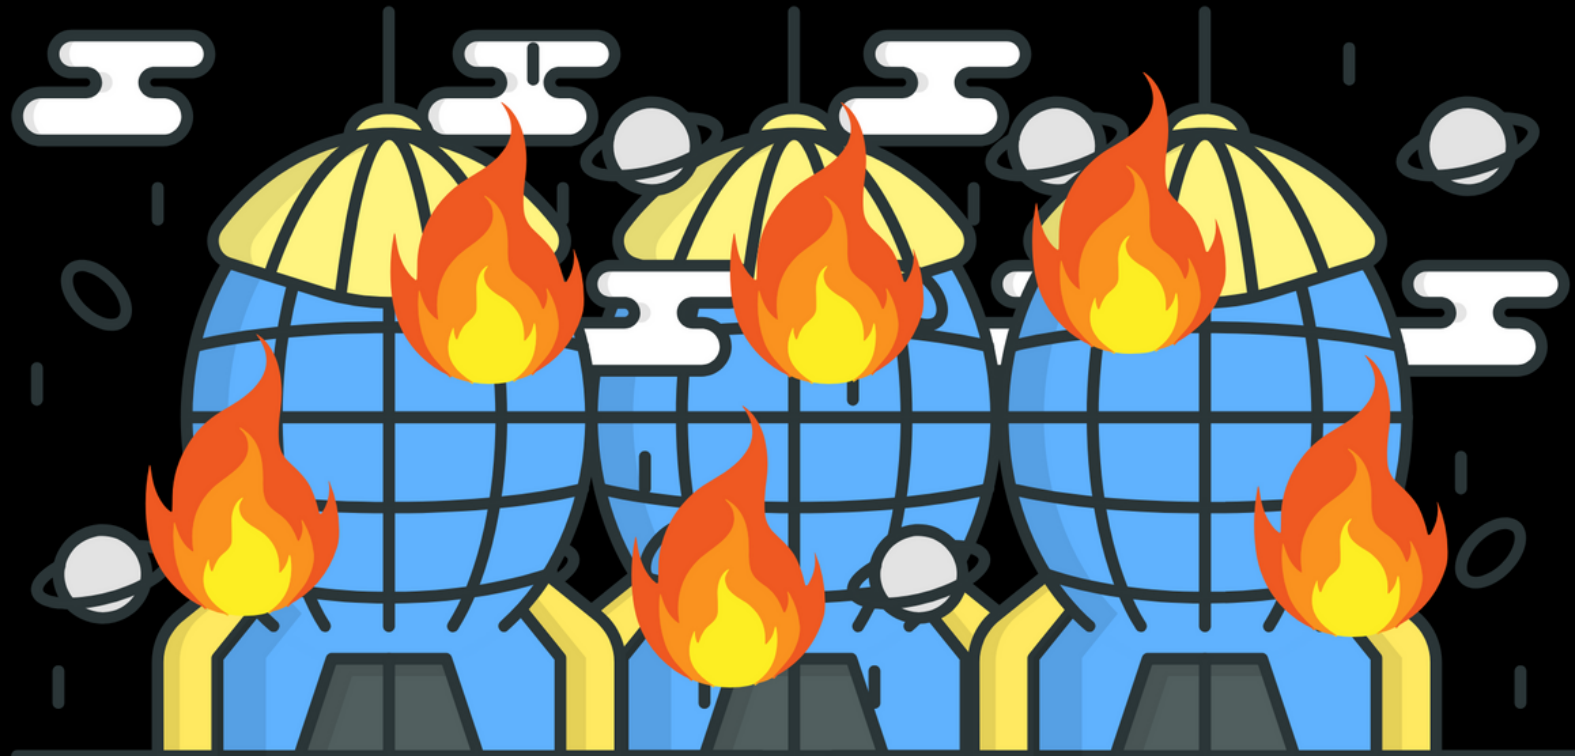

The aliens made
Cell bigger, but he
was destroyed by
Hypnocron.

The alien planet was in
ruins. Every city destroyed.
The alien kind had fallen.

And, now he has an
army of robots. He is
now headed to Earth.

ABOUT

The GIANT Room

The GIANT Room is a creative STEM hub for kids with GIANT dreams who dare to act on them. We help kids to use STEM as a tool for self expression, creativity, and collaboration.

The GIANT Room offers after school programs, camps, family events, specialized co-design workshops with industry designers, and online creative bootcamp membership. Kids may join our programs online, in-person at our studio, or off-site at one of our partner locations in museums and schools.

Founded by two women with PhDs in education and backgrounds in science and engineering, we dream of a world where every child has the confidence to voice their ideas, have access to mentors and resources they need to build prototypes of their ideas, and the opportunity to share those ideas with their community... just like the GIANT kid who published their collaborative, creative work in this beautiful storybook to be shared with millions of families around the world.

Aliens have figured out how to make robots. But when their second robot goes wrong, what will happen to the alien race? Will they be destroyed? Read to find out...
